

GREEN WALLS & FACADES

Vertical garden systems
for biodiversity, insulation,
and visual impact.

PROJECT MARTELARENPLEIN

FIRM : EcoWorks

YEAR : 2025

Representative interior garden inside a building of the Flemish government.

The lower part on the -1 level is designed as a tropical woodland with Bucida and Caryota as outstanding large plants, while the vertical walls of the glass-roofed patio are covered with a vertical garden, consisting of a large variety of tropical ambling plants.

PROJECT MARTELARENPLEIN

FIRM : EcoWorks

YEAR : 2025

These plants were first carefully grown in the future pannels in the nursery, before the pannels were installed on the walls of the patio.
